

The C60 series is a line-interactive uninterruptible power supply (UPS) solution available from 800VA—2000VA.

It is one of the most compact systems available, providing the safe shutdown or continued operation of supported equipment in the event of a power failure.

The C60 UPS series uses line interactive (VI, Voltage Independent) technology, which performs in a similar way to an offline UPS.

A line-interactive solution includes a voltage regulator which maintains the inverter and redirects the DC supply. When the mains power fails or fluctuates, the load is transferred to the inverter output. This type of technology delivers a step-wave, which delivers a negligible transfer time of 4ms.

**Part Code: C60-800-UPS**

**800 VA / 480W**

**Dimensions: 100 x 287 x 142 WxDxH (mm)**

**Part Code: C60-1000-UPS**

**1000 VA / 600W**

**Dimensions: 146 x 350 x 160 WxDxH (mm)**

**Part Code: C60-1500-UPS**

**1500 VA / 900W**

**Dimensions: 146 x 397 x 205 WxDxH (mm)**

**Part Code: C60-2000-UPS**

**2000 VA / 1200W**

**Dimensions: 146 x 397 x 205 WxDxH (mm)**
